## Backup Administration

Perform a backup of your site daily to a chosen directory on your filesystem.

## Backup Settings

Warning: We do not recommend the automatic backup procedure for production installations, as it may require a large amount of memory, CPU and disk space.

Instead, we recommend that you perform a manual backup of your Confluence database, home directory and attachments. For more information, please refer to our online documentation.

Perform backups **Disabled**

The Backup job can be enabled/disabled through the Schedule Jobs administration page.

Backup Filename (Sample) **backup-2018\_07\_30**

Backup File Prefix **backup-**

Backup File Date Pattern **yyyy\_MM\_dd**

Backup Path **/efs/confluence-shared-home/backups**

Custom backup paths are not enabled. More about custom backup paths
