Site Configuration

Edit

Configure the appearance and behaviour of the site as a whole. The most important is the **Server Base URL**, which **must** be set to the externally-accessible address of your Confluence site.

Site Title **Confluence**

Allows you to specify the site's title which will appear on the browser title bar.

Server Base URL **https://confluence.csc.com**

The Server Base URL is the url via which users access Confluence.

More about the Server Base URL

Contact Administrators Message

Please enter information about your request for the site administrators. If you are reporting an error please be sure you include information on what you were doing and the time the problem occurred.

Allows you to configure the message that is shown to a user when they try to contact the site administrators. This should be entered using wiki markup.

Not defining a message will lead to the default message being displayed.

☒ **Contact Administrators Form**

Display a contact form when trying to contact the confluence-administrators. This can only be turned off if there is a custom contact administrator message.
